Network speeds.

Read their fine print.

Some people love talking about
network speeds. In truth, these are theoretical
peak network speeds that you never seem to get.
Read their fine print and they will admit just that.

What's more, speed alone does not guarantee a great experience.
For that to happen, you need a special ingredient
- our human touch.

It's the technology choices we make so that you don't have to bother.

It's our obsession with detail, our constant tweaking and our optimising.
It's the small things we adjust, the fine-tuning we conduct.

Beautifully consistent and responsive to your command,
whether it's a nicely buffered video, a hassle-free
download or a smoothly loading website.

This is our award-winning speed with performance
- the experience you deserve.

Named Best Network in Hong Kong
by a leading global investment bank
(As reported by Ming Pao, July 16, 2013. smartone.com/mingpao/en)

Named Best Telecom Provider (Mobile)
by HK Golden IT Award 2013

Love the difference
