

SmarTone successfully bids for 2600MHz spectrum

(Hong Kong, 19 March 2013) SmarTone today announced that it has successfully bid at the auction in Hong Kong for 2 x 10MHz at the 2600MHz frequency band for HK\$640 million. This additional spectrum will enable increased mobile broadband capacity as well as better facilitate the refarming of other frequencies in future.

“We are pleased to acquire this spectrum which will be a key building block in our plans for further network capacity expansion to meet the increasing customer needs and to deliver an outstanding customer experience. This investment reinforces our commitment to serving our customers and furthering our market leadership. I am confident that this investment will also be accretive to shareholder value,” said Mr. Douglas Li, CEO of SmarTone.
