# SmarTone Cloud Gateway Services

Businesses of all sizes now encounter a series of inevitable transformations with new business models and technology. To stay ahead in the competition, enhancing business agility with high data availability is pivotal to sustainable growth. Our Cloud Gateway offers you a secure and scalable solution for data back up and file archive to improve productivity and collaboration in a cost effective way.

Solution Description

Leveraging the advantages of on-premises storage and centralised cloud-storage infrastructure, the Cloud Gateway delivers high-speed and high performance local data access. The robust cloud platform ensures your data can be protected, recovered and archived flexibly and securely. You can enjoy the hassle-free experience as the complicated procedures on application recoding and integration are not required anymore. Your files can be synced and shared automatically and securely wherever you are and whenever you need it, with only one easy step.

Read-Only Access

Key Benefits

Increase Operation Efficiency

- Local NAS (Network Attached Storage) enables quick retrieval of frequent-access data
- High data availability for remote offices

Simple and Automated

- Plug and play solution – no system integration or individual storage change is needed
- Fully automated service for data replication, data movement, backup, archiving and deduplication with systematic data management process
- Simplified deployment, provisioning, management and protection of data at remote sites, branch offices and customer sites
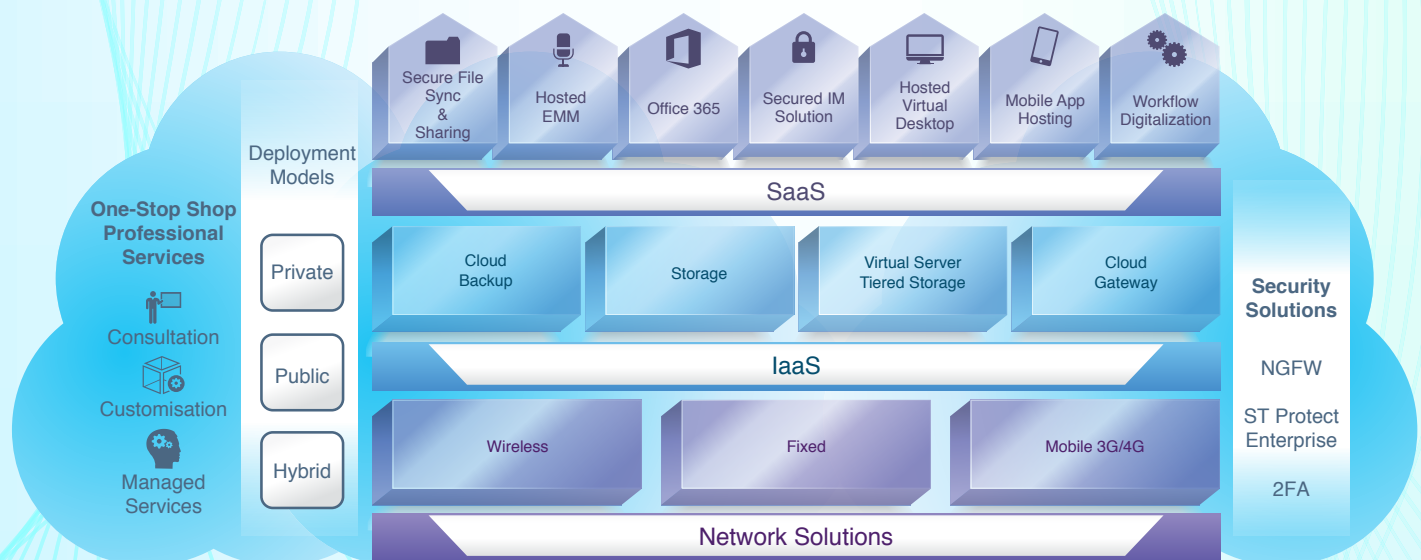

Flexible and Secure

- Integrated local cache storage with cloud storage to create seemingly endless storage, without saturation or hardware upgrade problem
- Non-stop data replication and backup to minimise data loss and to meet recovery objectives
- Centralised management in a secure way including optional 256-bit encryption, WORM, RAID, AD and LDAP authentication, data compliance and high resiliency
- Always-on protection, with data encryption for total security in transit and at rest

Cost Effective

- One-stop shop service to reduce IT footprint, capital investment and on-going maintenance costs
- Budgeted and consumption-based cloud service
- Automated, backup-free solution that reduces IT workloads
