

SmarTone Secure File Sync & Share

To catch up with this digital business era, you must harness the value of 'Cloud' by using it. Nowadays, you are not expected to have access to your office documents and data only via your desktop PC at work, but also from your smartphone, your tablet, and your laptop etc., wherever you are and whenever you need it because you want business collaborations without boundaries.

Solution Description

Cloud-based storage sync and share service can make seamless your access to or edit of your office files — no more emailing files to yourself or plugging and unplugging USB thumb drives. With this service, all your company files are always accessible and in their most up-to-date state in a user-friendly way. However, you need an absolutely secure solution to ensure your invaluable company information is always protected.

Secure Object Store Service

File Sync and Share

Mobile Workforce

Key Benefits

Increase Productivity

- Native apps and web portal enable employees to work anytime, anywhere, with their own devices (applicable for iOS, Microsoft and Android)
- Better collaboration with controllable, speedy and secure file sharing
- Higher efficiency to access the selected files offline
- Convenient file sharing without size limitation of traditional email inbox

Easy to Use

- Enterprise-class service with user-centric and consumerised tools including mobile apps and software
- Easy to deploy and manage, no end-user training is required
- Compatible with existing IT environments, VPN connection is unnecessary

High Security and Control

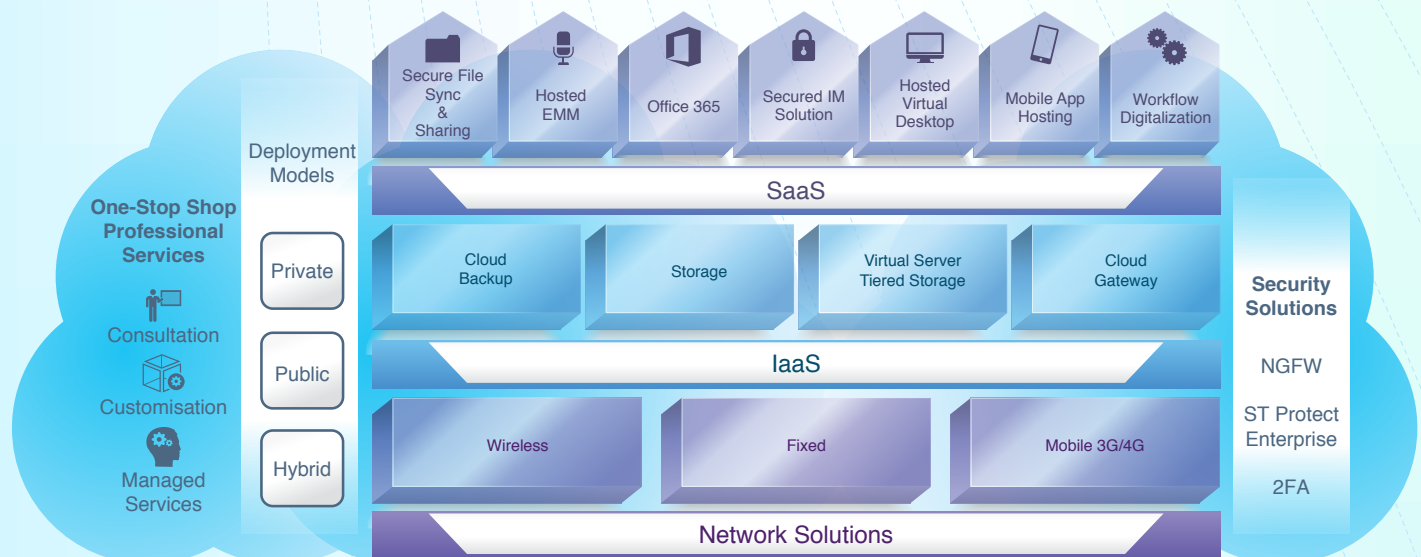

- Secure protection of company data with proper stewardship and governance, apps and cloud without permission are not allowed
- Better data control by setting expiry date, password and read/ write authority
- Complete audit control with file versioning
- Seamless integration with the existing Active Directory® and LDAP directory
- Always-on protection with data encryption for total security in transit and at rest

Cost Effective

- Budgeted and consumption-based cloud service
- Minimised upfront investment on hardware, software, deployment and ongoing administration costs
- Automated, backup-free solution that reduces IT workloads and the data center footprint
